

# LOCAL INTEGRATED VOICE & DATA

Since 1993, Access One has been providing high quality, cost effective communications services to business customers throughout the United States. Access One offers a diverse portfolio of voice, data and Internet products.

**LOCAL** Integrated service combines voice and data over a single circuit delivering a fully integrated communications platform for small to medium sized, stand alone businesses. Standard line side and digital options are available. This product supports company growth with the ability to accommodate additional voice lines and/or Internet bandwidth as needed. With customer equipment, maintenance and support included in one monthly fee, Access One offers your business new levels of speed and affordability.

**THE COMPLETE INTEGRATED SOLUTION FOR YOUR BUSINESS.**
