PRESS RELEASE

**ACCESS ONE INC SUCCESSFULLY COMPLETES
SOC 2 TYPE 1 EXAMINATION**

For Immediate Release

*Independent Examination Demonstrates Access One's Commitment
to Security and Compliance*

Chicago, IL – June 12, 2023 – Access One Inc., a Chicago based managed IT services provider, announced today its successful completion of a SOC 2 Type 1 examination. This is a significant achievement for a service organization, as it demonstrates management has suitably designed controls to protect their customers' sensitive data.

SOC 2 is a cybersecurity compliance framework developed by the American Institute of Certified Public Accountants (AICPA). Access One's SOC 2 examination was performed by Schellman & Company, LLC, a fully accredited CPA firm, against the trust services criteria categories of availability and security. By engaging an independent CPA firm to examine and report on the suitability of the design of controls implemented, Access One can respond to the needs of their user entities with an objective evaluation that addresses operations and compliance.

"Access One is committed to establishing a hallmark of trust with our clients and prospects in delivering strategic cybersecurity and managed technology services," said Ryan O'Halloran, CTO, vCISO of Access One.

Completion of the SOC 2 Type 1 examination represents Access One's dedication to providing high quality services while creating long lasting relationships with their customers and becoming a trusted partner in their successes.
